ALLOWANCE

Applicant has filed an RCE along with an IDS for consideration by the examiner on 1/16/07.

The present application is a CIP of the parent Serial No. 10/623,616 (PGPUB US 20040067422 A1), which is now US Patent No. 7,001,697. The IDS filed here lists US 7,001,697 as prior art. The claims of the present US application 10/775772, though present in US 2004/0067422 A1, were not present in the parent application 10/623,616. These claims are different and do not recite all of the limitations of the parent.

Therefore, the claimed invention is distinguished over the prior art of record in that the prior art does not teach a photomask comprising: a pattern of radiation blocking regions on at least one of the first and/or second surfaces of a transparent substrate, and an array of shadowing elements within the transparent substrate between the first and second opposing surfaces wherein a shadowing element of the array has a light transmittance characteristic different than that of an adjacent portion of the transparent substrate and wherein a transmittance of the patterning radiation through a portion of the transparent substrate including the array of shadowing elements is greater than approximately 20%.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
